NEW PRODUCTS 2010

For over a hundred years, our machines, our actions and our know-how remained unchanged, in order to offer the world a soap of high quality and high reputation.

It is obtained by a mixture of oil and soda. It is then crushed with rollers granite to provide smoothness and softness to our products. A mixer allows you to integrate the ingredients used in the soap (honey, essences, perfumes, lavender grains). The product is poured into an extruder to obtain "lumps" of soap. The soaps are then hand stamped, molded or labeled.

250g Oval Olive Oil Soap made the traditional Marseille way: Lavender/Olive/Honey, Raisin, Violet, Lavender, Rose, Lily of the Valley, Verbena, Mimosa.

Beautiful Ceramic Soap Dish – 18th Century French Style to enhance any bathroom or power room.
